## **Governance Reform for NASC and Diocesan Schools**

During 2016 the Diocesan Council explored ways in which Diocese can develop the governance of its Anglican schools to promote greater interdependence and lay foundations for an expansion of Anglican schooling in the Diocese in the future. In conjunction with the NASC and with consultation with the individual schools an Ordinance was passed in June 2016 creating a school system approach whereby a single school board operates overarching individual school councils.

## **Mission giving across the Diocese**

In February of this year Soma was removed as a beneficiary of Diocesan mission giving.

The Newcastle Diocese pledges annually one of the highest amounts to mission from all Dioceses across the country. The total amount contributed in 2015 was \$366,000. The work of the Missions Committee and in particular the chair, the Reverend Canon Katherine Bowyer's has been instrumental in the Diocese achieving this result.

## Notes to the Financial Statements For the Year Ended 31 December 2015

### 1 Summary of Significant Accounting Policies

#### (a) Basis of preparation

The Council Members have prepared the financial statements on the basis that the entity is a non-reporting entity because there are no users dependent on general purpose financial statements. These financial statements are therefore special purpose financial statements that have been prepared in order to meet the requirements of the Synod of the Anglican Diocese of Newcastle.

The financial statements have been prepared in accordance with all applicable Australian Accounting Standards and other mandatory professional reporting requirements (Urgent Issues Group Interpretations) that have a material effect with the following exceptions:

AASB 7 - Financial Instruments: Disclosures  
AASB 101 - Presentation of Financial Statements  
AASB 107 - Statement of Cash Flows  
AASB 124 - Related Party Disclosures  
AASB 132 - Financial Instruments Disclosure and Presentation

The significant accounting policies disclosed below are those which the Council Members have determined are appropriate to meet the needs of the Synod of the Anglican Diocese of Newcastle. Such accounting policies are consistent with the previous period unless otherwise stated.

The financial statements have been prepared on an accruals basis and are based on historical costs unless otherwise stated in notes.

#### (b) Comparative figures

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

#### (c) Critical accounting estimates and judgements

The preparation of financial statements in conformity with Australian Accounting Standards requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the entities accounting policies.

##### Key estimates - impairment

The Council assesses impairment at the end of the reporting year by evaluating conditions specific to the entity that may be indicative of impairment triggers. Recoverable amounts of relevant assets are reassessed using value-in-use calculations which incorporate various key assumptions.

ABN 66 773 701 473

## Notes to the Financial Statements For the Year Ended 31 December 2015

### 1 Summary of Significant Accounting Policies continued

#### (d) Plant and equipment

Each class of plant and equipment is carried at cost less, where applicable, any accumulated depreciation and impairment losses.

Cost includes expenditure that is directly attributable to the asset.

#### Depreciation

The depreciable amount of all fixed assets including buildings and capitalised leased assets, is depreciated on a straight-line basis over the asset's useful life to the entity commencing from the time the asset is held ready for use.

The depreciation rates used for each class of depreciable assets are:

Plant and Equipment	10-25% PC
Leasehold improvements	14% PC
Computer Equipment and software	20-50% PC

The assets' residual values, depreciation methods and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains and losses are included in the statement of surplus or deficit and other comprehensive income.

#### (e) Financial instruments

##### Initial recognition and measurement

Financial assets and financial liabilities are recognised when the entity becomes a party to the contractual provisions of the instrument. For financial assets, this is equivalent to the date that the entity commits itself to either the purchase or sale of the asset (i.e. trade date accounting is adopted).

Financial instruments are initially measured at cost on trade date, which includes transaction costs, when the related contractual rights or obligations exist. Subsequent to initial recognition these instruments are measured as set out below.

Financial instruments are subsequently measured at either amortised cost or cost.

The classification of financial instruments depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and at the end of each reporting period.

### 1 Summary of Significant Accounting Policies continued

#### (e) Financial instruments continued

##### Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are subsequently measured at amortised cost.

Loans and receivables are included in current assets, except for those which are not expected to mature within 12 months after the end of the reporting period.

##### Impairment

Objective evidence that a financial asset is impaired includes default by a debtor, evidence that the debtor is likely to enter bankruptcy or adverse economic conditions. At the end of each reporting period, the entity assesses whether there is objective evidence that a financial asset has been impaired through the occurrence of a loss event or a significant or prolonged decline in the value of the instrument is considered to indicate that an impairment has arisen.

Where a subsequent event causes the amount of the impairment loss to decrease (e.g. payment received), the reduction in the allowance account (provision for impairment of receivables) is taken through profit and loss.

Impairment losses are recognised through an allowance account for loans and receivables in the statement of surplus or deficit and comprehensive income.

##### Derecognition

Financial assets are derecognised where the contractual rights to receipt of cash flows expires or the asset is transferred to another party whereby the entity no longer has any significant continuing involvement in the risks and benefits associated with the asset. Financial liabilities are derecognised where the related obligations are either discharged, cancelled or expired. The difference between the carrying value of the financial liability extinguished or transferred to another party and the fair value of consideration paid, including the transfer of non-cash assets or liabilities assumed, is recognised in statement of surplus or deficit and other comprehensive income.

#### (f) Impairment of non-financial assets

At the end of each reporting period, the entity assesses whether there is any indication that an asset may be impaired. The assessment will include the consideration of external and internal sources of information. If such an indication exists, an impairment test is carried out on the asset by comparing the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use to the asset's carrying value.

Assets, that have an allocated impairment loss are reviewed for reversal indicators at the end of each reporting period. After recognition of an impairment loss, the amortisation charge for the asset is adjusted in future periods to allocate the asset's revised carrying amount on a systematic basis over its remaining useful life.

Impairment losses are recognised as an expense immediately.

### 1 Summary of Significant Accounting Policies continued

#### (g) Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits held at call, other short-term highly liquid investments with original maturities of three months or less which are convertible to a known amount of cash and subject to an insignificant risk of change in value.

#### (h) Employee benefits

Provision is made for the entity's liability for employee benefits arising from services rendered by employees to the end of the reporting year. Employee benefits are measured at the amounts expected to be paid when the liability is settled.

Contributions are made by the entity to an employee superannuation fund and are charged as expenses when incurred.

#### (i) Provisions

Provisions are recognised when the entity has a legal or constructive obligation, as a result of past events, for which it is probable that an outflow of economic benefits will result and that outflow can be reliably measured.

#### (j) Trade and other receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost, less provision for doubtful debts.

Impairment is assessed in accordance with Note 1(e).

#### (k) Trade and other payables

Trade and other payables represent the liability outstanding at the end of the reporting period for goods and services received by the entity during the reporting period which remain unpaid. The balance is recognised as a current liability with the amounts normally paid within 30 days of recognition of the liability.

#### (l) Income tax

The Anglican Diocese of Newcastle General Fund and Budget Account is exempt from income tax under section 50-5 of the Income Tax Assessment Act 1997.

## Notes to the Financial Statements

### For the Year Ended 31 December 2015

#### 15 Financial Risk Management continued

Mitigation strategies for specific risks faced are described below:

##### Interest Rate Risk

The Anglican Diocese of Newcastle General Fund and Budget Account is exposed to interest rate risk fluctuations on its cash at bank and cash on deposit.

##### Credit risk

The maximum exposure to credit risk at balance date to recognised financial assets, is the carrying amount, net of any provisions for impairment of those assets, as disclosed in the statement of financial position and notes to the financial statements.

Credit risk is managed through a collection policy based on the amount, ageing and circumstances related to the outstanding amounts. The level of debt and the doubtful debts provision is reviewed regularly by the Council Members. Any debts required to be formally recovered by legal action by management are done so in accordance with the collection policy.

The Anglican Diocese of Newcastle General Fund and Budget Account does not have any material credit risk exposure to any single receivable or group of receivables under financial instruments entered into apart from inter entity and other Diocesan entity loans.

##### Liquidity risk

Liquidity risk arises from the possibility that The Anglican Diocese of Newcastle General Fund and Budget Account might encounter difficulty in settling its debts or otherwise meeting its obligations related to financial liabilities. The fund manages this risk through the following mechanisms:

- preparing forward-looking cash flow analysis in relation to its operational, investing and financial activities which are monitored on a monthly basis;
- monitoring undrawn credit facilities;
- obtaining funding from a variety of sources;
- maintaining a reputable credit profile;
- managing credit risk related to financial assets;
- comparing the maturity profile of financial liabilities with the realisation profile of financial assets.

Typically, The Anglican Diocese of Newcastle General Fund and Budget Account ensures that it has sufficient cash on demand to meet expected operational expenses as required.

##### Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.
